AC-5C-MD, TE-5C-MD
 AC-5A-MD, TE-5A-MD
 TE-5K-MD, TE-5S-MD

DESCRIPTION: Series 5 are centrifugal magnetic drive pumps, eliminating the need for a shaft seal. All are serviceable with a screwdriver.

OPERATION: Pumps are not self-priming, lack a suction lift, and thus require a **flooded suction**. Pumps **cannot be run dry** because the impeller requires the liquid being pumped for lubrication. For liquids with a specific gravity greater than water, have a higher viscosity, or for elevated temperatures, a trimmed impeller may be necessary. For application assistance, contact March Pump.

ELECTRICAL: TE Models are dual voltage 115 Volt / 230 Volt and have a conduit box. AC Models are either 115 Volt or 230 Volt and have a 3 ft (0.9 m) Cord. All models have U.L. listed motors which are rated for continuous duty.

All specifications/values are based on pumping water and are intended as a guideline only. Values may vary with different motors.

PARTS LIST

When attaching the Drive Magnet to motor shaft, position the face of the Drive Magnet 3/32 inch below the face of the Motor Bracket.
