WWW.MARCHPUMP.COM

DESCRIPTION & OPERATION: 809-HS-C DC Series hot water booster centrifugal magnetic drive pumps are built to handle liquid transfer in heating and cooling operations. Contact the factory for application assistance. Pumps are not self-priming, lack a suction lift, and thus require a flooded suction. Pumps cannot be run dry.

INSTALLATIONS: Pumps should be installed with the pump housing arrow pointing in the direction of flow within the system. If the arrow indicating flow is not in the direction required, remove the housing screws holding the housing to the motor bracket and rotate the housing assembly as required. Replace the screws and tighten. The pump is composed of a wet end assembly which can be separated by unscrewing the housing screws. The pump will then separate into 2 parts. The liquid will be contained within the wet end assembly unless the rear housing screws on the rear housing are loosened.

GENERAL SAFETY INFORMATION: Follow all local safety codes & the Occupational Safety and Health Act (OSHA). Make certain that the power source conforms to the requirements of your equipment. Always disconnect power source before performing any work on or near the electric motor. Caution must be exercised to relieve any pressure in the system & in draining hot water from the pump or the system.

ELECTRICAL: Motor type is brush DC in 12 Volt or 24 Volt. The red lead is positive & the black lead is negative.

Specifications		809-BR-C	809-PL-C	809-SS-C
Product	12V	0809-0146-0300	0809-0180-0300	0809-0177-0400
	24V	0809-0146-0400	0809-0180-0400	0809-0177-0300
Inlet-Outlet		3/4"MPT-1/2"MPT	3/8"FPT & 3/4"MPT-1/2"MPT	3/4"MPT-1/2"MPT
Max Internal Pressure		150PSI (1034 kPa)	50PSI (344 kPa)	150PSI (1034 kPa)
Max Liquid Temperature		250F (121C)	250F (121C)	250F (121C)

809-HS-SS-C				DISASSEMBLY & REASSEMBLY: The motor can be removed from the wet end assembly without draining the liquid from the system. To do so remove four housing screws and slide the motor assembly away. If parts inside the wet end assembly must be removed, isolate the pump or drain the system. When the system is drained and cool, remove the four screws from the rear of the housing. The rear housing can now be removed. Remaining pump parts can be removed. Replace any
