

**<u>DESCRIPTION:</u>** Series 5 are centrifugal magnetic drive pumps, eliminating the need for a shaft seal. All are serviceable with a screwdriver.

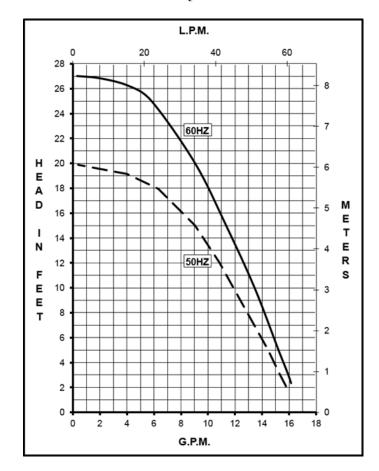

<u>Model Abbreviations:</u> TE: Encapsulated Impeller, AC: Air Cooled Motor, C: Polypropylene, K: Kynar

<u>OPERATION:</u> Pumps are not self-priming, lack a suction lift, and thus require a **flooded suction**. Pumps **cannot be run dry** because the impeller requires the liquid being pumped for lubrication. For liquids with a specific gravity greater than water, have a higher viscosity, or for elevated temperatures, a trimmed impeller may be necessary. For application assistance, contact March Pump.

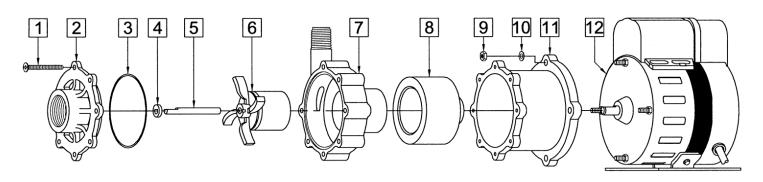

**ELECTRICAL:** Models are either 115 Volt or 230 Volt and have a 3 ft. (0.9 m) Cord. Models have U.L. listed motors, which are rated for continuous duty.
