DESCRIPTION: Series 5 are centrifugal magnetic drive pumps, eliminating the need for a shaft seal. All are serviceable with a screwdriver. The "LC" model is hermetically encapsulated allowing the pump to run fully submerged or in open air for complete moisture protection. Model 5C-MD must be run submerged only. See the parts list for a breakdown of parts.

OPERATION: Pumps are not self-priming, lack a suction lift, and thus require a **flooded suction**. Pumps cannot be run dry because the impeller requires the liquid being pumped for lubrication. For liquids with a specific gravity greater than water, have a higher viscosity, or for elevated temperatures, a trimmed impeller may be necessary. For application assistance, contact March Pump.

ELECTRICAL: Motors are available in different electrical configurations such as 115 Volt 50/60 Hz, or 230 Volt 50/60 Hz, 1 phase. 115 Volt motors have a 6 ft. (1.8 m) cord with plug. 230 Volt motors have a 6 ft. (1.8 m) cord with no plug. The motors are U.L. listed and rated as continuous duty.

Materials in contact with the solution:

5C: Polypropylene, Ceramic, Buna N, Ceramic Magnet, Noryl, Stainless Steel, Brass, Epxoy and Cord.

LC-5C-MD: Polypropylene, Buna N, Stainless Steel, Ceramic, Ceramic Magnet. When Submerged: Epoxy, Noryl, and Cord.

<u>LIMITED WARRANTY</u>: March pumps are guaranteed only against defects in workmanship or materials for a period of one year from date of manufacture pumping water. For the complete warranty and to register online go to www.marchpump.com/warranty-registration

NOTE: Contact Factory for other materials and/or parts not listed.

Special voltage motors are available upon special order.
