**DESCRIPTION:** [Series 5 are centrifugal magnetic drive pumps](#), eliminating the need for a shaft seal. All are serviceable with a screwdriver.

**OPERATION:** Pumps are not self-priming, lack a suction lift, and thus require a **flooded suction**. Pumps **cannot be run dry** because the impeller requires the liquid being pumped for lubrication. For liquids with a specific gravity greater than water, have a higher viscosity, or for elevated temperatures, a trimmed impeller may be necessary. For application assistance, contact March Pump.

**ELECTRICAL:** Models are dual voltage 115/230V for 60hz and 110/220V 50hz. The standard motor has a conduit box. A motor with 115V 72 inch cord and plug or 230V 72 inch cord, are options. The motor is U.L. listed motor and rated for continuous duty. The pump is rated IP44. The pump is Ignition Protected per SAE J1171 and ISO 8846.
